EASY TO USE, EASY TO UNDERSTAND

Investor360® works with today's most popular Internet browsers, including Internet Explorer, Firefox, Safari (for Macintosh), and Chrome. Just log on and point and click to manage, monitor, and navigate within your accounts however you like:

Overview displays your accounts and their current values, as well as asset allocation, performance, and benchmark information, and provides charts of your current net worth and historical values.

Holdings shows you all your holdings (even those held elsewhere) at various levels (i.e., by asset and by asset category) with the option to group them either by account or by securities held across all accounts. It also allows you to export data directly to Excel. Choose from up to 20 columns of data that are most important to you.

Additional Assets lets you add account information from outside sources and view it all through Investor360°
